

Custom Engraving for Marine NCO Swords

Custom laser engraving is available for the blade of your genuine Marine Corps NCO Sword. Standard price includes up to 40 characters of text on two lines at one location with your choice of fonts. Spaces DO NOT count as part of your 40 characters.

Our standard placement of the engraving is done to allow for display purposes, with the engraving from “grip-to-tip”, with the grip to the left. Engraving is in the blood groove, to the right of the factory etching. Contact us for other options.

NOTE: This engraving style may not be suitable for active-duty Marine wear. Check Marine Corps regulations for style and placement of engraving, and specify this in your order. Thanks.

See following pages for available fonts. Only one font per location.
